olm file is useless to me This is because Google doesnt overwrite the original contacts but creates new contacts which will create duplicates in most cases.. VCF or CSV file Chances are you probably dont have to mess with it but its good to know in case you import Outlook contacts and end up with mismatched fields.. Select Export to a file under Choose an action to perform and then click the Next button.. Thats because Google doesnt overwrite the original contacts but creates new contacts that in most cases create duplicates. ae05505a44 [Bamboo Software Download Mac](#)
